

Prices for software products of Joint-Stock Company KB "Panorama"

Software cost includes cost of annual technical support - free updating of versions (within the older version numbers) by downloading of updating from the site, the provision of the information and technical assistance by means of the answer to treatment in the forum. Each subsequent year of technical support is extra paid at the rate of 24% of program cost (one workplace), including VAT.

The cost of GIS software products with the fixed and floating license per one workplace - the same. The minimum number of workplaces on a single key with a floating license - 3. All products support multi-user access to spatial data in the network.

Fixed license requires a dongle for each workplace, a **floating license** - the presence in the local network of a dongle, which allows to perform the paid number of copies of software on any computers at the same time.

For the fixed license the dongle is available in **forms-factors micro** (it is specified in the order).
